## FOR WHPMPANTHER OS · PANTHER SHELL · DJ EWW-POWER

Ref. WHPM-LGW-2026 · In effect since 01.01.2026 · © WHPM — World Hurricane Panther Music

**Plain-language summary, before the legal detail:** WHPMPANTHER OS is software that runs in your browser, on your device. We don't run servers that watch what you click, we don't build a profile of you, and we don't sell anything about you to anyone. The only things that touch a server at all are the small technical files needed to make pages load, and the advertising banners that help cover hosting costs. Running a VPN puts even that last trace fully in your hands. Read on for the complete version, with no shortcuts taken.

### I. Ownership & Identity

**1.1** WHPMPANTHER OS, together with its complete software, source code, designs, audio, branding and the entire connected ecosystem — including the Panther Shell interface and the DJ EWW-Power sound identity (collectively, “WHPM”) — is the exclusive intellectual property of WORLD HURRICANE PANTHER MUSIC, its founder and chief architect.

**1.2** Copying, decompiling, reverse-engineering, redistributing or imitating any part of the WHPM system without the owner's written consent is strictly prohibited and may be pursued under applicable Slovak, EU and international law (including WIPO and the Berne Convention).

**1.3** The WHPM name, logo, the Panther mascot, the DJ EWW-Power identity, and all derivative marks are protected creative works. Unauthorized commercial use may result in civil or criminal liability.

### II. Hardware Permissions

**2.1** Certain apps inside WHPMPANTHER OS may ask your browser for permission to use device features — for example location, camera, microphone, or Bluetooth — strictly so the specific feature you opened can work.

**2.2** These permissions are requested individually by your browser, not silently by WHPM. You see every prompt and can deny any of them; declining a permission may simply mean that one feature won't work, while the rest of the system continues normally.

**2.3** No hardware access is used to track you outside of the feature you explicitly activated. WHPM does not run background location tracking, does not record audio or video without an active, visible prompt, and does not sell device data to anyone.

### III. Privacy, Cookies & Advertising

**3.1 — No tracking, no profiling, no data sales.** WHPM does not operate an analytics or tracking system. We do not build behavioral profiles, log activity across apps, or sell any information about you to third parties.

**3.2 — What actually runs locally.** WHPMPANTHER OS stores your preferences (window positions, theme, notes, settings) using your browser's localStorage, directly on your own device. This data never leaves your browser and is never transmitted to us.

**3.3 — Technical cookies only.** The websites and apps reachable through this system use only the strictly necessary technical cookies required to load pages and keep sessions working.

**3.4 — Advertising banners fund the servers, nothing more.** Some screens display banner advertising, used only to help cover hosting and bandwidth costs.

**3.5 — Want to remove even that?** Using a VPN routes your connection through a different address before it reaches us or any advertiser.

**3.6** Personal data, to the limited extent any is ever processed, is handled in line with the EU General Data Protection Regulation (GDPR, Regulation (EU) 2016/679).

## IV. Disclaimer of Liability

**4.1** WHPMPANTHER OS functions as a terminal/bridge environment running entirely in your browser. It does not itself host, generate or control third-party content accessible through linked apps, the PWA Store, or other external destinations reachable from the desktop.

**4.2** WHPM is not responsible for the content, legality, or quality of material found on third-party platforms that the system merely provides a path to.

**4.3** You are solely responsible for anything you choose to download, install, or otherwise do with files or apps obtained through WHPMPANTHER OS.

**4.4** The system is provided “as is,” without warranty of uninterrupted availability or specific performance.

## V. Acceptable Use & Ethics

**5.1** WHPMPANTHER OS is a politically neutral piece of software, built to make useful tools accessible to ordinary people across a wide range of devices.

**5.2** Using the system for illegal activity, spreading disinformation or hateful content, political agitation, hacking, or surveilling other people without their consent is strictly prohibited.

**5.3** Violating this section entitles the operator to immediately block access and, where warranted, to report the conduct to the relevant authorities.

**5.4** You agree to use the system in good faith and in compliance with the laws applicable in your jurisdiction.
